

1Love Health®

FAR INFRARED SAUNA BLANKET

ZERO / PREMIUM ZERO

SAUNA BENEFITS

Did you know that 30 minutes in a Sauna has the same cardiovascular effects as a 30-minute moderate bike ride? What's better than PASSIVE EXERCISE? Take a nap, meditate, or watch a show... all while lying down in complete comfort. It's the easiest thing you can do for cardiovascular health and general well-being!

In fact, increased frequency of Sauna bathing is associated with a significantly reduced risk of all-cause mortality.

The Control Box for your Sauna is in Celsius.
If you prefer Fahrenheit, use this handy conversion chart!

- LIVE A LONGER LIFE
- IMPROVE CARDIOVASCULAR HEALTH
- LOWER INFLAMMATION
- IMPROVE BRAIN HEALTH
- STIMULATE YOUR IMMUNE SYSTEM
- DETOXIFY
- RELIEVE & REDUCE PAIN
- REDUCE STRESS & FATIGUE
- PROMOTE SKIN HEALTH
- BURN CALORIES
- **ADDITIONAL BENEFITS**
Improves lymph circulation, treats allergies, aids in digestion, relieves constipation, kills and removes unhealthy cells, including cancer cells, promising results for Lyme disease, as well as many other hard to treat issues.

**These claims are all backed up by years of research and many scientific studies. Please do your own research and consult your doctor before using a Sauna for medical treatment.*

OVERVIEW

Your 1Love Sauna Blanket utilizes Far Infrared ray technology to warm the body from the inside out, providing penetrating heat. You will experience a deeply cleansing sweat, as well as countless profound health and therapeutic benefits. The 1Love Sauna Blanket delivers Far Infrared heating to all areas of your body, for 360 degrees of intense coverage ~ with complete temperature control to suit your unique health goals.

Healing stones (on applicable models)

Healing stones have been used throughout the world and in traditional Chinese medicine for centuries. They are said to assist in the release of negative ions as well as provide many additional benefits for health. Negative ions play a major role in helping to detoxify and enhance your body's overall well-being. They have long been associated with improvements in mood and physical health. All of the stones we use enhance the Far Infrared rays and help to maintain a smooth and consistent heat. The stones are pulverized into a powder and then hardened into discs, maximizing the effective surface area and benefits.

Tourmaline is a 'grounding' stone, well known for its detoxifying and cleansing effect on the nervous system, as well as the organs and tissues of the body. It has been shown as a useful aid for improving circulation, reducing stress, improving brain alertness, and activating the immune system.

Tourmaline is one of only a handful of minerals that have the ability to emit negative ions and Far Infrared rays. Negative ions play a major role in helping to detoxify and enhance the body's overall well-being. They have long been associated with improvements in mood and physical health.

Jade is known to aid in detoxification and stimulation of Qi (life force). According to Eastern Medicine, it stabilizes the personality, promotes self-sufficiency, soothes the mind, and helps to release negative thoughts. Jade is known to be a symbol of serenity and purity, and signifies wisdom gathered in tranquility.

Jade aids the body's filtration and elimination organs. It is excellent for treating kidneys and adrenal glands. It is known to have a restorative property, allowing for both the cellular and skeletal systems to re-bind themselves. Jade may assist with the removal of pain associated with your body's healing process.

INSTRUCTIONS

LOCATION & SETUP

Use anywhere, including chairs, couches, floors, beds, or massage tables. Your Sauna is adaptable to your needs: for a full Sauna experience, use the Blanket as instructed below. You may also use it 'open' and lay on it or place it over your body for comfort and relief of joint or muscle pain.

TOWEL (optional)

Towel: Place a towel on the Blanket prior to preheating your Sauna. This enables the towel to achieve the proper temperature.

No Towel: A towel is not required, however the stones can get hot. If the heat from the stones becomes uncomfortable, please lower the temperature or use a towel.

PLASTIC PROTECTION SHEET

Installation: Prior to using the Sauna, attach the optional Plastic Protection Sheet. To attach, use the Velcro in the center of the Blanket.

Alternative: You can also lay on a towel which will help absorb some of your sweat. You may use a towel with or without the plastic sheet.

TEMPERATURE SETTING

LOW Intensity 60°–70° C [140°–158° F]

HIGH Intensity 70°–80° C [167°–176° F]

Preheat for 10-30 minutes before using

Models with Healing Stones: For a more intense experience preheat your Sauna Blanket for up to 30 minutes. This allows the stones to completely capture the Infrared energy and will heighten the intensity of your Sauna experience.

Recommendation: Start with LOW Intensity settings and try your Sauna for at least 20 minutes, prior to using HIGH Intensity settings.

*Please see *Celsius to Fahrenheit Conversion Chart* on page 1.

GETTING IN YOUR SAUNA

Far Infrared is designed to interact directly with your body. It heats people, not things. Make sure to remove all or most of your clothes for the best experience.

- Set the timer to your desired duration.
- Lie down with the 2 smaller 'flaps' at your shoulders and the big 'flap' at your feet.
- Fold all 3 flaps over the Blanket to help retain heat.
- Wrap the Blanket around you and securely fasten the Velcro.

HOW LONG SHOULD YOU SAUNA?

Typically, people Sauna for 20 to 45 minutes, 3-5 times a week. When using as an intensive therapy, Sauna as often as twice per day and up to 7 days a week. Our minimum recommendation is 20 minutes, 2x/week.

When the timer counts down to ZERO, you will hear a 5 second beep, indicating your session is over and the Sauna will stop heating.

How long does it take to sweat?

Some people will quickly break a sweat. For others, it may take 20+ minutes at the maximum temperatures.

Long before you break a sweat, your body will be receiving the benefits of 1Love Far Infrared technology. The miracle of Far Infrared is that it deeply penetrates your body, and raises your temperature from the inside, out. Far Infrared Therapy doesn't require much heat. **Remember, you are getting amazing benefits even if you don't want to sweat.**

AFTER YOU SAUNA, WHAT'S NEXT?

Cleanse. Your sweat brought toxins to the surface of your skin, and it is important to wash them away. Some people prefer a cold shower to reset body temperature to normal. A cold 'plunge' provides additional benefits, including strengthening your immune system, reducing inflammation, improving circulation, and decreasing stress levels. Do what feels right for you, and what your doctor recommends.

STAY HYDRATED, and feel amazing!

You can lose 1 pint of fluid or more during each Sauna session. Hydration is vitally important for health and proper bodily function.

Recommendation: Drink 1 glass of water prior to using the Sauna, and 1 glass when you are done. Please stay hydrated!

CLEANING YOUR SAUNA

Wipe the Blanket dry after each use. For occasional sanitizing, mix equal amounts of white vinegar and water in a spray bottle. Spray on lightly, and then wipe dry after a few minutes. The smell of the vinegar will dissipate with ventilation. You can also add a bit of lemon, or a drop of Tea Tree or Eucalyptus essential oils.

DO NOT USE A CLEANER CONTAINING ALCOHOL

CONTRAINDICATIONS

Check with your doctor if you are extremely sensitive to temperature, have sustained an injury or had recent surgery, are pregnant, have a pre-existing heart condition, or are on medications which may interact with heat.

TROUBLESHOOTING

'EE' showing on Control Box

Check connections at the back of the Control. A gray connection cable may not be plugged in properly. Please turn off power at the back of the Control Box, then unplug the gray wires and securely plug them back into the control box.

The Sauna is not getting hot

Remember to press the **START** button after setting the (3) temperatures! When the Sauna is heating, you will see small flashing dots on the Control Box.

No lights on Control Box

-Ensure the POWER SWITCH at the back of the Control Box is ON.

-Ensure the power cord is firmly plugged in to the back of the Control Box. If unsure, unplug it and plug it back in securely. **Push the power cord in HARD!** It will go in farther than you think.

-Make sure that the wall outlet you are using is 'live'. You can test it by plugging in another appliance, lamp, or phone charger. If the outlet is not active, check your breaker box to see if the circuit is tripped. Although the 1Love Sauna Dome can operate on a 15-amp circuit, it works best with a 20-amp circuit. If you are using a 15-amp circuit, please make sure no other appliances are using the circuit at the same time.

My thermometer shows a lower temperature than the Control Box

Don't worry, you are still getting the full intensity of your temperature settings. Far Infrared heats up people, not things. Your Sauna may not get very hot, but you will. 1Love Saunas heat at a Far Infrared Wavelength of 4-15um. This wavelength resonates perfectly with the human body but is slow to heat the air or other surfaces.

The temperature readout on the Control Box (in Celsius) is the accurate temperature of the carbon fiber heating wire. This ***WILL NOT be the temperature of the interior of the Sauna, or the air.***

Why aren't there lights in my Blanket?

Far Infrared is INVISIBLE light. Humans can't see it. There are no lights in 1Love Saunas.

PRECAUTIONS

- Do not operate in close vicinity to water (bathtub, pool, or shower).
- Touch the stones to test the temperature before using. Use a towel over the stones if you prefer less intense heat.
- Do not store in direct sunlight.
- Do not submerge any part of the Sauna in water.
- ***Make sure the Sauna is cool prior to storing.***

SPECIFICATIONS

- EMF Average: 0.284mG
- Heating Element: Zero EMF Carbon Fiber
- Power: 600-Watt, 110-Volt Standard US Plug
- 3 independently controlled heating zones
- Temperature Setting: 77-176 Fahrenheit / 25-80 Celsius
- Timer Setting: 5-60 minutes with alert beep when session is complete
- Dimensions: 72" x 72" (open) / 32" x 72" (closed)
- Wavelength: 4-15um infrared ray
- Stones – (applicable models): 32 Jade & 64 Tourmaline
- Materials
 - Outer: Durable Waterproof 100% Nylon
 - Inner: SGS and RoHS Certified Non-Toxic PVC

CERTIFICATIONS

SGS, RoHS Chemical Certification, CE (EMC, LVD), IEM, IEC, Far Infrared Ray, Negative ION

PACKAGE CONTENTS

Pro Control Box, 1 Power cord, 3 Integrated Blanket Cables, 1 FIR Blanket, 1 Pillow, 1 Waterproof Barrier (applicable models)
